# Installation

Step 1: Orient the mount as shown Install the Adhesive Mount

Orient the mount as shown on the illustration above. Clean your windshield surface thoroughly and allow it to dry before applying the static cling. Peel off one plastic layer from the static cling and apply it to your preferred spot. Peel off the other plastic layer and attach the Rexing adhesive mount onto it Make sure the mount is facing to the correct slide in direction.

Firmly press the mount onto the windshield. Wait **at least** 20 minutes before mounting the camera.

### Step 2: Insert the Memoru Card

The Rexing S800 accepts [Class 10/ UHS-1 or higher] Micro SD memory cards up to 256GB. You will need to insert a memory card before you can begin recording. Before inserting or removing a memory card, first ensure you've powered down the device. Please go to for more details of the SIM card activation and functions.

# 

# Step 3: Power the Camera and Format the Memory Cord

Power the camera by connecting the charger to the car cigarette lighter and camera. Before you start using a new memory card, you must format the card within the camera using the format function. This will ensure the S800 records to your memory card properly and without error. Always backup important data stored on the memory card before formatting.

# Enjoy Your Product! www.rexingusa.com

Download the Rexing S800 Manual

10/10/2019 3:55 PM

To format the memory card, make sure you have inserted your memory card, then turn on the device by connecting to a power source.
