Installation

Step 1 mount as shown Install the Adhesive Mount

Orient the mount as shown on the illustration above Clean your windshield surface thoroughly and allow it to dry before applying the static cling. Peel off one plastic layer from the static cling and apply it to your preferred spot. Peel off the other plastic layer and attach the Rexing adhesive mount onto it. Make sure the mount is facing to the correct slide in direction.

Firmly press the mount onto the windshield. Wait **at least** 20 minutes before mounting the camera.

Step 2: Insert the Memory Card

The Rexing S800 accepts [Class 10/ UHS-1 or higher] Micro SD memory cards up to 256GB. You will need to insert a memory card before you can begin recording. Before inserting or removing a memory card, first ensure you've powered down the device. Please go to for more details of the SIM card activation and functions.

Orient the

Step 3: Power the Camera and Format the Memoru Cord

Power the camera by connecting the charger to the car cigarette lighter and camera. Before you start using a new memory card, you must format the card within the camera using the format **function.** This will ensure the S800 records to your memory card properly and without error. Always backup important data stored on the memory card before formatting.

Enjoy Your Product!

Press the OK button to confirm formatting the card

Press 🗳 on the left corner of Main Menu. Select "Storage" and then press "Format SD". Press "OK" to confirm formatting the card.

After the SD card is formatted, you may now disconnect.

Step 4: Installing the Rear Camera

Mount the rear camera as shown below. Use the provided rear camera cable to connect the rear camera to the front camera.

Step 5: Installing the Camera onto the Windshield

Place the camera on the mount and carefully route the power cable around the windscreen and tuck it under the trim.

Plug the car charger cable to a 12V DC power outlet or the car cigarette lighter.

Connect car charger to the camera. The camera will auto-start recording once it's powered on.

Basic Operation

Device Power

The device will be automatically powered on when plugged into a 12V accessory socket or a cigarette lighter when receives a charge (i.e.: the vehicle is started).

To turn the device on manually, press and hold the Power button until the welcome screen appears.

The camera will automatically start recording when it is powered on.
