▌▌ Installation

### Step 1: Install the Dash Cam

Place the 3M tape on the Mount and properly orient the Mount square to the roof and hood line of the vehicle. **Important!** Ensure the T-interlock on the Mount is oriented in the correct direction.

Firmly press the Mount onto the windshield. **Wait at least 20 minutes before mounting the camera.**
Step 2: Insert the Memory Card

The Rexing V1 accepts [Class 10/ UHS-1 or higher] Micro SD memory cards up to 256GB. You will need to insert a memory card **before you can begin recording. Before inserting or removing a memory card, first ensure you've powered down the device.**

Gently push the memory card in until you hear a click, and allow the spring release to push the card out.

Orient the mount as shown

Press the Power button to turn the power off

Step 3: Power the Camera and Format the Memory Card

Power the camera by connecting the charger to the car cigarette lighter and camera.

To ensure the V1 records to your memory card properly and without error. **Before you start using a new memory card, you must format the card within the camera using the format function.** Always backup important data stored on the memory card before formatting.

Connect Mini-USB to the camera

Blue LED lights indicate the device is charging or powered on

Enjoy Your Product!

Download the Rexing V1 Manual
https://www.rexingusa.com/support/product-support/

Press the Menu button twice

Press the OK button to confirm formatting the card
All data will be deleted

Cancel
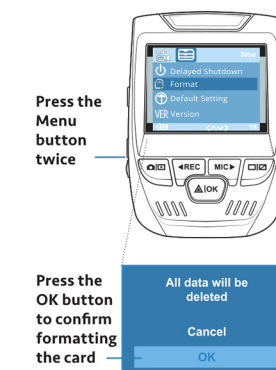

Step 4: Installing the Camera onto the Windshield

Place the camera on the mount and carefully route the power cable around the windscreen and tuck it under the trim.

Plug the Car Charger Cable into a 12V DC power outlet or the car cigarette lighter.

Connect car charger to the camera. The camera will auto-start recording once powered on.

Plug Mini Spin Connector to the Dash Cam

Route power cable to the Dash Cam

Plug charger into power outlet or cigarette lighter

▮▮▮ BASIC OPERATION

Device Power

The device is automatically powered on when plugged into a 12V accessory socket or cigarette lighter and receives a charge (i.e.: the vehicle is started).

To turn the device on manually, press and hold the POWER button until the welcome screen appears.

The camera will automatically start recording when powered on.
Press and hold the Power button to turn the device on manually

Menu Settings

Power the camera On. If the camera is recording, press the REC button to stop recording. Press the MODE button and toggle to the desired mode.

Press the MENU button once to enter the settings menu for a Mode. Press the MENU button twice to enter the System Settings.

System icon

Video Mode icon

Press the Menu button to select the desired setting

Press the Mode button and toggle to the desired Mode
Video Recording

The camera will automatically start recording when the device receives a charge. The LED lights and the red dot will blink when the device is recording. Press the REC button to stop recording.
Video Playback

Playback of videos can be done on the device or a computer. Also, if you have purchased a Rexing GPS Logger you may play back the recordings in a specialized application.

To playback a video on the device, toggle to the Playback mode. Use the REC and MIC buttons to toggle to the desired video. Press the OK button to play.

During playback use the OK (pause), MIC (fast forward) and REC (rewind) buttons to control the video playback.

The camera automatically starts recording when powered on
Playback mode

Control playback with these buttons

To playback a video on the computer either use an SD card adapter or connect the device to the computer directly using the USB cable.

To playback a video using an SD card adapter, remove the memory card and insert it into an SD card adapter. Place the adapter in the computer.

To playback a video using USB cable, connect the USB Cable to the device and the computer. After the device powers up, press the OK Button to select Mass Storage.

On the computer, navigate to device drive. The videos are stored at: \CARDV\MOVIE. Select the video to playback.

Parking Monitor

Connect the dash cam to the smart hardwire kit to activate the parking monitor function (Need to purchase the smart hardwire kit separately. ASIN:B07RN24B7V)
Please visit support.rexingusa.com to watch a video tutorial.

Connect USB connector to computer

Select Mass Storage

PC Camera

Wi-Fi Connect

Download "Rexing Connect" app from the App Store/ Google Play Store.

1 To access or exit the Wi-Fi feature, hold down OK.
2 Open Wi-Fi settings on your phone, find "SSID: B50___XXXX" from the list, tap to connect. (Default password: 12345678)
3 Open the Rexing Connect app, tap "Connect" to enter the realtime video streaming page.
4 Once connected, the dash cam screen will switch to the camera view and will display "Wi-Fi Connect" message.
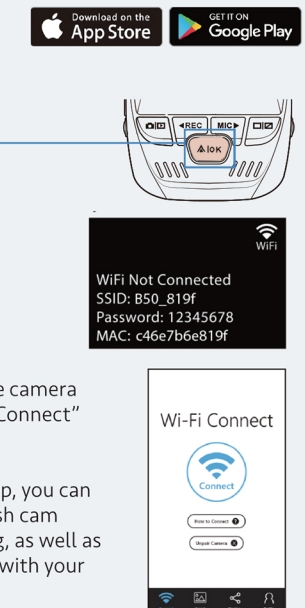

Using the Rexing Connect app, you can view a live preview of the dash cam screen, start / stop recording, as well as view and save your captures with your mobile device.

For further instruction regarding the Wi-Fi Connect feature, please visit
www.rexingusa.com/wifi-connect/.

Wi-Fi Connect

GPS Logger

(Need to purchase separately. ASIN:B07BL4NCMD)

When connected to the camera, it will record the speed and location of your vehicle as you drive.

You can then access this information while playing back your recordings using the GPS Video player (For Windows and Mac, available at rexingusa.com).

Press the MENU button twice and enter the System Settings.

Toggle to the GPS Speed Unit setting and select your preferred speed unit.

After a GPS signal is found, the screen icon will turn from blue to green.

Please visit gpsa.rexingusa.com to watch a video tutorial.
