What's in the Box?

1

2

3

4

- 1. Motion Sensor
- 2. Smart Hardware Kit
- 3. Mini-USB to Mini-USB Cable
- 4. User manual

Please DO NOT enable the parking monitor function in the settings of the dash cam once connected. This intelligent hardwire kit will override the dash cam's parking monitor feature.

Overview

Step One

Once the dash cam is attached on the windshield with the included adhesive mount, place the motion sensor on the top of the windshield about a few inches away from the dash cam.

Please make sure that the motion sensor is not blocked by any object, especially the rear view mirror.

Step Two

Connect the motion sensor with the included USB cable.

Step Three

Run the wiring towards the fuse box with the included smart hardwire kit.

Smart Hardwire Kit Connection

If you have different fuse type, please visit our support page at <https://www.rexingusa.com/support/> for details.

Step One

Find the switched fuse and connect the RED cable to it. This fuse has power only when the car is on.

Step Two

Find the hot fuse the connect the YELLOW cable to that. This fuse has power at all time.

Step Three

Attach the black fuse cable. Make sure to attached the GROUND cable to the bolt near the fuse box.

Step Four

Finally, connect the power cable to the dash cam. Please **DO NOT** enable the parking monitor function in the settings of the dash cam. The motion sensing will automatically on once the vehicle is powered off.

Once the blue indicator is on, which means that the sensor has detected motions. The intelligent hardwire kit will power up the dash cam automatically and start recording until the motion is cleared.

Warranty & Support

Warranty

The Rexing Intelligent Hardwire Kit comes with a full 12-month warranty. If you register your product on our official site (<https://www.rexingusa.com/support/registration>), you can extend the warranty to 18 months.

Support
