Product Overview

The RoadMate CPStream is designed for enhanced driving safety with minimal interaction, supporting both Apple CarPlay and Android Auto. Moreover, it boasts the ability to play movies and music directly from an SD card. This feature allows for music playback during drives and movie watching during breaks, ensuring entertainment without compromising safety.

- 1 Home: Return to home screen

- Android Cast: stream videos from your android
- Audio output: click to select the sound playing mode
- Settings: view system settings

- (i) Click to enter the Bluetooth music playback interface
- (5) Click to enter the movie and music playback interface

Installation

Install the RoadMate CPStream

Prepare the Mounting Position:

Clean the dashboard or windshield: Ensure the area where you'll mount the device is clean and free from dirt, oil, or debris. Use a mild cleaner to wipe the surface and dry it thoroughly.

Plug charger into power outlet or cigarette lighter

1 Type C interface

To supply power, connect the (1) Type-C end of the power cable to the main device, and then insert the (2) cigarette lighter plug into the appropriate socket inside your vehicle.

2 Cigarette lighter Note: Please use the charger provided with the Rexing unit. Using an unauthorized charger may easily damage the device or cause injuries due to insufficient voltage and excessive heat.

CarPlay

As depicted in the above figure, click the 'CarPlay' button, then select the 'CarPlay' option, and initially, activate the phone's WiFi and Bluetooth, as illustrated in the figure above. Bluetooth will automatically activate and be named T86B-XXX. Once Bluetooth is successfully connected, you can proceed to connect to CarPlay.

Note:

When the machine is powered on, it will attempt to automatically connect to the last connected phone.

Click Assistive Touch to display the shortcut menu: Home, Record, Volume, Brightness

Apple CarPlay is supported only with iPhone models starting from the iPhone 5 and newer. To disconnect, turn-off bluetooth and Wi-Fi on your mobile device.

Android Auto

As depicted in the above figure, click the 'Android Auto' button, then select the 'Android Auto' option, and initially, activate the phone's WiFi and Bluetooth, as illustrated in the figure above. Bluetooth will automatically activate and be named T86B-XXX. Once Bluetooth is successfully connected, you can proceed to connect to CarPlay.

Note:

When the machine is powered on, it will attempt to automatically connect to the last connected phone.

Click the Details button for detailed connection steps and connection FAQs.

Click Assistive Touch to display the shortcut menu: Home, Record, Volume, Brightness.

When Assistive Touch is turned off, you can tap the [Exit] button to return to the home page.

Wireless Android Auto option is only supported for Android phones. To disconnect, turn-off bluetooth and Wi-Fi on your mobile device.

AirPlay

AirPlay can transmit video, audio, and pictures from an iPhone device to car equipment. The transmission medium is WiFi, which is fundamentally different from Bluetooth wireless.

Click the Details button for detailed connection steps and connection FAQs.

1. Requires an iPhone to connect to WiFi

2. Select SmartScreen in Screen Mirroring in the iPhone Control Center

Note:

Only support iPhone

Android Cast

Scan the QR code and download the mobile app to stream a mirror projection of your mobile phone screen onto the adapter's digital display.

Click the Details button for detailed connection steps and connection FAQs.

Note:

Only compatible with Android.

Bluetooth Music

	Carplay	Android Auto	Airplay	Android Cast	Bluetooth music

	00:00 •				
Ċ		I	Þ	M	

First, turn on your phone's Wi-Fi and Bluetooth. Then, select the [Bluetooth Music] option. Bluetooth will be automatically activated on the Smart Screen, and the Bluetooth name will be displayed in the upper left corner. Connect your smartphone to the adapter's Bluetooth to stream your music.

The buttons correspond to "previous song", "play/pause" and "next song" respectively.

Click on the Lyrics button 🔄 to display the lyrics.

Some mobile music player apps do not support displaying lyrics

Media Player

As shown in the figure above, click the [media player] button to enter the movie and music playing interface.

Tap to play or pause videos and music.

List Loop / Random Play / Single Loop / Sequential Play

Click to return to the previous screen.

TS	AVC (H.264)

Audio format support: MP3 / WAV

Audio output

Speaker

The sound will be played from the speaker of the smart screen.

BT Auto

Select BT Audio, and then connect to **CarPlay** or **Android Auto** to cast the screen, you can use the phone's Bluetooth to directly connect to the original car's Bluetooth. After the connection is successful, all sounds from the device will be transmitted to the original car speakers via Bluetooth.

After selecting this mode, the volume icon will change to the Bluetooth transmission icon , and the volume cannot be adjusted on this device, so the volume must be adjusted on the original car.

FM

After selecting FM, the FM transmission mode will be activated by default. For instance, if the device's FM transmit band is tuned to FM 106.0 MHz (any unoccupied channel can be used), the car radio will similarly tune its receive band to the same FM 106.0 MHz. Following a successful connection, all sounds from the device will be transmitted to the original car speakers via FM transmission. After selecting this mode, the volume icon will change to an FM transmission icon \mathbf{FM} , and the volume cannot be adjusted on this device, so the volume must be adjusted on the original car.

(Not using the original power cord may result in a deterioration of the FM transmission signal or loss of function.)

AUX

Upon selecting this mode, the AUX output mode will be activated by default. Utilize the AUX sound source cable to connect the smart screen to the original car. Following a successful connection, all sounds from the device will be transmitted to the original car speakers through the AUX sound source cable for playback.

Upon selecting this mode, the volume icon will change to the AUX output icon (), and the volume cannot be adjusted on this device; therefore, adjustments must be made on the original car.

Settings

Click on **Reminder tone** to enter the settings: you can choose to turn it off or on. After selecting "off," the power-on sound effect and touch and button sound effects will be disabled. (Different models may have different options, subject to the actual product).

Click Screen saver to access settings: the screensaver can be set as Turn off / 10s / 30s / 1min. After setting for 10 seconds or 1 minute, if the system does not operate for the corresponding time, the screen will automatically turn off. After entering the screensaver, press the power button again to turn on the screen.

Click on **Auto-dimmings** to freely set: automatically adjust the brightness time and brightness value.

Click on Driving Position to enter the settings:

You can choose between left-hand or right-hand drive, and the shortcut menu bar in CarPlay.

Select left rudder on the left, select right rudder on the right

Click on Language to enter the settings: Language can be set: Simplified Chinese / Traditional Chinese / English / Russian / Spanish / French / German / Japanese / Korean / Arabic / Italian / Portuguese

Assistive touch This is the hover window button in your phone's screen casting mode. You can choose to close or open it. This feature is only supported by Carplay and Android auto modes to hide.

If you change mobile phones, click to clear the connection records of all previous mobile phones.

Click on Voice Control to enter the settings:

Voice control commands include: Show rear camera / Turn on display / Turn off display.

After opening the option, on the main interface, say the corresponding command entry, and the system will perform the corresponding operation.

Click Factory reset to enter the settings:

Restore factory settings, and the system will restore all settings to their original state.

Click on Firmware Version to enter the menu:

This option allows you to see the current basic version for easy confirmation.

Troubleshooting

Number	Problem	Solution
1	Unable to start	 Check whether the power cord is damaged or aged.
		2. Check whether the fuse of the power cord is disconnected or burnt out
2	No touch phenomenon	1. Touch is invalid during power-on, wait for normal power-on before operation.
		 Check whether the touch is damaged, do not touch the screen with sharp objects, it is easy to scratch and damage.
3	High temperature lag phenomenon of the match	The normal operating temperature of T86B PND 6.25 is -4 F. If the temperature exceeds the limit, disconnect the power. Wait until the temperature of the T86B PND 6.25 falls below 149 F before turning the power back on to begin operation.

4	Carplay cannot	1.The first connection takes a little longer.		
	connect	2. Only iPhone supports Carplay		
		3. Check that the Wi-Fi and Bluetooth functions of the mobile phone are normal		
		 Enter Settings - General - Carplay vehicle, delete all records and reconnect. 		
		5. Restart the iPhone and reconnect it.		
		6. Turn on the Siri function on your phone.		
5 Android Auto cannot conne	Android Auto	1.Only Android phones are supported.		
	cannot connect	2. Update Auto and related applications on mobile phones to the latest version.		
		3. Do not enable VPN on the mobile phone.		
		4. Check that the Wi-Fi and Bluetooth function of the mobile phone are normal.		
		5. Restart the Android phone and connect it again.		
6	The bluetooth music	Please set the screen casting mode to Bluetooth music. Other modes do not support Bluetooth music.		

Reminder: Please ensure that there is no obstruction between the mobile phone and the device, and the WiFi / Bluetooth signal communication is smooth, otherwise the product functions cannot be used smoothly.
